

Aprender sobre la tuberculosis es

¡Vivir A Todo Pulmón!

Share information, not TB!

Is caused by
germs

Can be fatal if not
treated

Usually affects
the lungs

When active,
causes symptoms
and can be spread

Can be latent
or active

BCG
vaccine
does not
prevent TB
infection

TUBERCULOSIS

Did you know...

Is spread
through the air

- Can cause:
- Feelings of sickness
 - Weakness
 - Weight loss
 - Fever
 - Night sweats
 - Cough with or without blood

The vaccine
for TB is
BCG (Bacille
Calmette-Guerin)

BCG vaccine helps to
protect against severe
forms of TB in kids

Is treated with
several medicines
for several months
(6 to 12 months)

It is very important to take
the entire treatment as
is directed by your
healthcare provider
